INSTRUCTIONS FOR USE :

1. Massage your clay until it is soft and flexible.
2. Shape the soft clay with tools or by hand as required.
3. Work on a non porous surface such as metal or plastic.
4. Add a drop of water if clay begins to dry out too fast while working and also moisten fingers.
5. Wrap your project in plastic wrap and cover with a damp cloth for any short rest periods.
6. It's recommended you place your excess clay into a resealable airtight container when not in use.
7. Wash your work surface and any clay tools with water after each use.
